

# Condon Hernia Institute

## overview

Medical College of Wisconsin surgeons who are part of the Condon Hernia Institute see hernia patients at multiple locations: Wauwatosa at Froedtert & The Medical College of Wisconsin; Menomonee Falls at Froedtert Health Community Memorial Medical Commons and Froedtert Health Community Memorial Hospital.

Our surgeons focus on a broad range of abdominal wall defects, ranging from inguinal hernias to those that may require complex abdominal wall reconstruction. They use the latest techniques to treat inguinal hernias, including totally extraperitoneal (TEP) or transabdominal pre-peritoneal (TAPP) laparoscopic repairs for primary, bilateral and recurrent hernias. Ventral and incisional hernias are treated with traditional and minimally invasive methods, including laparoscopic component separation with the latest biologic grafts. Operations are chosen based on each patient's needs and based on the latest-evidence based data.

- Program led by Matthew I. Goldblatt, MD, director of the Condon Hernia Institute and associate professor of Surgery at The Medical College of Wisconsin
- Fully staffed with Medical College of Wisconsin surgeons who are highly experienced in all aspects of hernia surgery
- Provide the latest in minimally invasive techniques for appropriate candidates
- Treat complex hernias, including abdominal wall reconstruction; collaborate with plastic surgeons
- Tailor the treatment approach to the patient, carefully considering quality of life issues
- Provide treatment options that offer reduced pain, faster recovery and return to daily activities
- Large volume practice with consistently high quality of outcomes
- Will accommodate urgent cases same day

## we work with you

Our physicians and staff work closely with referring physicians to coordinate treatment, as well as follow-up care. The Condon Hernia Institute surgery team provides an initial evaluation report after the patient's first visit and subsequent progress reports.
