The Real Story of Living Donation and Kidney Transplant
How did you hear about organ donation?
When did you begin to think about living donation?
How did you make the decision to pursue living kidney donor transplantation?
How did your family and friends respond to your decision?
What did you do to find your donor?
What did you have to go through to become a donor or transplant candidate?
After the surgery, can you describe what your recovery was like? What didn’t you expect? How long did it take you to get back to your regular routine?
How would you describe your life BEFORE and AFTER kidney donation or transplant?
A special thanks to our partners at the National Kidney Foundation of Wisconsin
