To Your Health!

Brain Perfusion Image – Outpatient

Your doctor has ordered a Brain Perfusion to be conducted in the Nuclear Medicine department on the 2nd level of the 87th Street Specialty Clinics building.

Appointment Information

Time: ________________________ If you are not able to keep your appointment, please call (414) 805-3771.

Day: ________________________

Date: ________________________

If you are pregnant (or think you may be pregnant), or if you are nursing a baby, please inform your doctor before your appointment is scheduled.

WHAT IS A BRAIN PERFUSION?

Upon arrival for your appointment, you will be given an injection in the vein of your arm. This material needs to circulate in your body for a minimum of 30 minutes or up to 2 hours, depending on the type of material required for your individual procedure.

You will be asked to remove any metal hairpins or earrings and lie on a table with your head on a special head holder. This scan will take 45 minutes. It is important for you to hold still or your images will be blurred.

AFTER THE TEST

The images will be reviewed by a doctor who specializes in Nuclear Medicine. The doctor will carefully study the images and prepare a written report within 24 hours. Your doctor will inform you of the results.

REMEMBER...our staff is here to help you. If you have questions about any part of this test, please ask.

Please arrive 10 minutes prior to your appointment to complete the registration process. To find Nuclear Medicine, enter the campus on 87th street. Follow the signs to Parking Area 3. Take the parking structure elevator to level D. The bridge leads to the 2nd level of the Specialty Clinics Building. Follow the signs to Nuclear Medicine.
