Lung Image – Outpatient

Your doctor has ordered a Lung Image to be conducted in the Nuclear Medicine Department on the 2nd level of the Froedtert East Clinics.

Appointment Information
Time: __________________________ If you are not able to keep your appointment, please call
Day: __________________________ (414) 805-3771.
Date: __________________________

If you are pregnant (or think you may be pregnant), or if you are nursing a baby, please inform your doctor before your appointment is scheduled.

WHAT IS A LUNG IMAGE?
The Lung Image will assist the doctor in evaluating any abnormalities in your lungs. The examination can take from 1 to 3 hours. You will be lying on your back on a table. It is important that you hold still during the exam, or the images will be blurred.

The Lung Image can be a 2-part procedure. The first part will begin with an injection in the vein of your arm. Following the injection, eight (8) different images of your lungs will be taken.

If required, the second part of the exam will consist of breathing oxygen for a short period of time (8 to 10 minutes).

AFTER THE TEST
The images will be reviewed by a doctor who specializes in Nuclear Medicine. The doctor will carefully study the images and prepare a written report within 24 hours.

Your doctor will inform you of the results.

REMEMBER...our staff is here to help you. If you have questions about any part of this test, please ask.
Please arrive 10 minutes prior to your appointment to complete the registration process. To find Nuclear Medicine, enter the campus on 87th street. Follow the signs to Parking Area 3. Take the parking structure elevator to level D. The bridge leads to the 2nd level of the Specialty Clinics Building. Follow the signs to Nuclear Medicine.

SPECIAL INSTRUCTIONS

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
