If you are pregnant (or think you may be pregnant), or if you are nursing a baby, please inform your doctor before your appointment is scheduled.

WHAT IS A PARATHYROID IMAGE?
The Parathyroid Image will help detect an enlarged parathyroid gland. The parathyroid gland helps regulate calcium levels in the body.

There is no special preparation for the test.

You will be given an intravenous injection. After approximately 15 to 30 minutes, images of the parathyroid gland will be obtained. You may be asked to return after one or two hours for further imaging.

AFTER THE TEST
The images will be reviewed by a doctor who specializes in Nuclear Medicine. The doctor will carefully study the images and prepare a written report within 24 hours. Your doctor will inform you of the results.

REMEMBER...our staff is here to help you. If you have questions about any part of this test, please ask.

Please arrive 10 minutes prior to your appointment to complete the registration process. To find Nuclear Medicine, enter the campus on 87th street. Follow the signs to Parking Area 3. Take the parking structure elevator to level D. The bridge leads to the 2nd level of the Specialty Clinics Building. Follow the signs to Nuclear Medicine.

SPECIAL INSTRUCTIONS
