To Your Health!

ProstaScint Image – Outpatient

Your doctor has ordered a ProstaScint Image to be conducted in the Nuclear Medicine department on the 2nd level of the 87th Street Specialty Clinics building.

Appointment Time: ___________________________ If you are not able to keep your appointment, please call (414) 805-3771.
Information Day: ___________________________
Date: ___________________________

On the day of your examination, please bring with you a list of your allergies and all medications you are presently taking. The technologist will request this list at the time of your examination.

WHAT IS A PROSTASCINT IMAGE?
This examination will help locate prostate cancer. You will be lying on your back on a table during the imaging process. It is important you hold still or the images will be blurred.

Your first appointment will take approximately 2 hours. You will be given an injection into your arm, wait one hour, then you will be positioned under a gamma camera that takes special pictures of your body. After this, you will be asked to return in 5 days for a second imaging session.

At 24 and 48 hours before the second imaging session you will be asked to take an oral laxative. Before you come for this session, you will be asked to have a cleansing enema. In order to give the nuclear medicine physician a clearer picture to examine, you will have a catheter placed into your bladder when you arrive. This second imaging session will take approximately 3 hours.

At the end of this session we will inform you if further imaging is necessary.

AFTER THE TEST
The images will be reviewed by a doctor who specializes in Nuclear Medicine. The doctor will carefully study the images and prepare a written report within 24 hours.

Your doctor will inform you of the results.

REMEMBER...our staff is here to help you. If you have questions about any part of this test, please ask.
Please arrive 10 minutes prior to your appointment to complete the registration process. To find Nuclear Medicine, enter the campus on 87th street. Follow the signs to Parking Area 3. Take the parking structure elevator to level D. The bridge leads to the 2nd level of the Specialty Clinics Building. Follow the signs to Nuclear Medicine.
