To Your Health!

White Blood Cell Image – Outpatient

Your doctor has ordered a White Blood Cell Image to be conducted in the Nuclear Medicine department on the 2nd level of the 87th Street Specialty Clinics building.

Appointment Time: ______________________ If you are not able to keep your appointment, please call (414) 805-3771.
Information Day: ______________________
Date: ______________________

If you are pregnant (or think you may be pregnant), or if you are nursing a baby, please inform your doctor before your appointment is scheduled.

There is no special preparation for this examination.

WHAT IS A WHITE BLOOD CELL IMAGE?
This exam will detect sites of infection. The first day you arrive, the nuclear medicine technologist will draw your blood for labeling. The blood will be taken to the laboratory and tagged to a special tracer that will detect areas of disease. This process will take 2 to 3 hours and will be followed by a reinjection of your labeled cells.

Depending upon the reason for your exam, you may be imaged in 4 to 6 hours or the next day. Each session of imaging may last up to 1-1/2 hours.

During the exam you will be lying on your back on a table. It is important to hold still or the images will be blurred.

AFTER THE TEST
The images will be reviewed by a doctor who specializes in Nuclear Medicine. The doctor will carefully study the images and prepare a written report within 24 hours.

Your doctor will inform you of the results.

REMEMBER...our staff is here to help you. If you have questions about any part of this test, please ask.
Please arrive 10 minutes prior to your appointment to complete the registration process. To find Nuclear Medicine, enter the campus on 87th street. Follow the signs to Parking Area 3. Take the parking structure elevator to level D. The bridge leads to the 2nd level of the Specialty Clinics Building. Follow the signs to Nuclear Medicine.
