Who We Are

Froedtert Menomonee Falls Hospital, founded in 1964 by the citizens of Menomonee Falls and surrounding communities, is a full-service hospital that specializes in cancer care, heart and vascular care, orthopaedics, women’s health and advanced surgical procedures. Froedtert Menomonee Falls Hospital is part of the Froedtert & MCW health network, which includes eight hospital locations, nearly 2,000 physicians and more than 45 health centers and clinics. In our most recent fiscal year, outpatient visits exceeded 1.2 million, inpatient admissions to our hospitals were 52,807 and visits to our network physicians totaled 947,136.

Since 2017, the hospital has been home to inpatient training for Medical College of Wisconsin residents part of the Froedtert Menomonee Falls Hospital Family Medicine Residency Program. A three-year residency, the program includes 18 residents with six residents per class.

The hospital’s foundation supports the Froedtert Menomonee Falls Hospital mission. As the fund-raising arm of the hospital, the foundation funds many deserving projects directly benefiting patient care within the hospital as well as the broader community and service area through special events and giving campaigns.

The Community Outreach Health Clinic at Froedtert Menomonee Falls Hospital serves uninsured or under-insured individuals. No patient is turned away because of the inability to pay for needed health services.

With nearly 300 volunteers, Volunteer Services supports the mission of the hospital by providing care and services to patients, families, visitors, providers and staff.

A non-profit facility accredited by The Joint Commission, Froedtert Menomonee Falls Hospital enhances and improves the quality of life in Waukesha, Washington, Milwaukee and Ozaukee counties by combining next-generation technology with personalized care. Awards and Recognition

Complex Teaching Medical Center Honor from Vizient

Vizient ranked Froedtert Menomonee Falls Hospital No. 2 out of 82 participating complex teaching medical centers in the 2019 Vizient Quality and Accountability Ranking. The study assesses the performance in quality and safety across a broad spectrum of patient care activities for participating hospitals. According to the study, our patients have a higher likelihood of surviving, avoiding complications, receiving reliable care regardless of condition or personal status, and communicating effectively with physicians and staff, than they would at other participating institutions in this category across the country.
