Continuing Medical Education Lectures 2021

The Froedtert & the Medical College of Wisconsin health network works with MCW departments, individual faculty members and affiliated/community organizations to develop programming in the areas of primary care and specialty and subspecialty topics in medicine and surgery. We organize lectures and activities with a focus on professional responsibilities related to patient safety and advocacy, new technologies, research, health care policy, ethics and compliance. We strive to present content that is based on the best evidence currently available and that is free of commercial interest and bias.
